COMPREHENSIVE LITERACY GUIDES GRADES K-6

WORD WORK GRADES K-6

OVERVIEW

In order to become fully literate, students must have the ability to quickly and accurately recognize words.

They also have to proficiently use oral and written vocabulary to convey meaning. Word study is based on phonics, spelling and vocabulary. It provides time for students to practice, analyze and experiment with word patterns, develop automaticity with high frequency words and learn new words.

<http://www.k12reader.com/word-study-makes-language-learning-fun/>

RELEVANCE TO PROGRAM OF STUDIES

General Outcome 2

Comprehend and respond personally and critically to oral, print and other media texts

2.1 Use Strategies and Cues

2.2 Respond to Texts

2.3 Understand Forms, Elements and Techniques

SNAPSHOT

Traditional Spelling - In 1839, American educator Horace Mann introduced the whole-word memorization model. In 2000, a survey of classrooms showed that 85% of teachers were still using this model. Words were typically chosen from a publisher's series that the school adopted, a thematic unit the class was studying or a list of class "spelling demons" and these words were then studied for the Friday test. The source of the words may change, but this approach remains a one size-fits-all approach and students simply become a master of memorization rather than a master of language; these words did not generally carry over into students' writing. (Source: Teaching & Assessing Spelling, Mary Jo Fresch, Aileen Wheaton, Scholastic, 2002)

Individualized Spelling - Some teachers have tried to develop an individualized spelling program where students receive customized word lists every week. However, this can become time-intensive and difficult to manage.

Grouping Students for Learning - Teachers determine where students are at, group them for learning based on similar needs, and then provide differentiated instruction where students learn spelling patterns and generalizations.

CONSIDERATIONS - PLANNING TIPS - CLASSROOM DESIGN

- Assess students' word knowledge using informal spelling inventories and/or analysis of students' independent writing
- Consider which words should be prioritized for students, e.g, frequently occurring words, conversational vocabulary, and formal, academic vocabulary
- Watch for words students use but confuse and other inconsistencies. Build from what they know.
- Word Walls can be created to support student learning; focus on words commonly used in reading and writing. Word walls can also be developed in subject specific areas, e.g., a math word wall. Word walls should be developed as the year progresses, adding a few words each week.
- Whole group instruction can help students discover word patterns such as a Making Words lesson. Then, students can practice and refine skills in smaller groups with words of varying levels of complexity.
- Refer to *The Fountas & Pinnell Literacy Continuum(2017)* and/or *The Fountas and Pinnell Comprehensive Phonics, Spelling and Word Study Guide (2017)* for detailed explanations with regards to the nine areas of learning: Early Literacy Concepts, Phonological Awareness, Letter Knowledge, Letter-Sound Relationships, Spelling Patterns, High-Frequency Words, Word Meaning/Vocabulary, Word Structure and Word-Solving Actions
- Word work may occur at the end of guided reading lessons however, Fountas & Pinnell (2010) suggest that this should only take 1-3 minutes of the lesson (see Level C example in diagram on the next page):

WORD WORK GRADES K-6

Planning for Word Work after Guided Reading

One- to three-minute demonstrations and active student engagement using a chart or easel, white board, magnet letters, or pencil and paper can develop fluency and flexibility in visual processing. Plan for explicit work in specific visual processing areas that need support.

Examples:

- Recognize a few easy high-frequency words (e.g., the, and, like, here, look, see, is, can, in, it)
- Make several CVC words (cat, but, can, hot, get)
- Break apart CVC words (s-un, n-ot, g-et)
- Recognize several CVC words (for example, get, sun, man, not)
- Write/make several easy high-frequency words
- Sort letters quickly by a variety of features (uppercase or lowercase; tall or short; with and without sticks, circles, tails, dots, tunnels)
- Match/sort words with rhymes (using pictures)
- Match pictures with letters using beginning or ending sounds
- Say and clap syllables in one-, two-, and three-syllable words (from pictures)
- Locate words rapidly using first letter and related sounds
- Say words slowly and write letters related to sounds
- Read the Alphabet Linking Chart in a variety of ways (for example, all consonants, all vowels, every other letter)

WORD STUDY STRATEGIES

1. Say the word slowly and listen for the sounds you hear (initial sound, middle sound, final sound)
2. Say the word slowly and listen for any parts you know (br in brought)
3. Clap the syllables and write letters for each part you hear
4. Use words you know (fun and silly to funny)
5. Use names you know (William to will)
6. Use a rhyming word (rain to train)
7. Use word families to spell related words
8. Think about different spelling patterns that can spell the sound you hear (out vs. down)
9. Try it on a practice page and see if it looks right
10. Use a resource in the classroom (chart, word wall, book, dictionary, calendar, words you've already written)
11. Use diverse materials and methods to help students practice new words and word patterns: hopscotch, raps, sandpaper, fuzzy fabric, jello, pudding, sand, magnetic letters, small personal whiteboards, chalkboard apps on tablets, shape boxes, etc.

Structured Word Inquiry - using an inquiry approach, students begin to see how English spelling is actually a highly ordered system. They learn to analyze word structure for meaning cues and identify spelling patterns. It is has been used in PreK - 12 classrooms: <http://www.wordworkskingston.com/WordWorks/Home.html>

Teaching Latin Roots with Word Trees: <https://blog.allaboutlearningpress.com/teaching-latin-roots-with-word-trees/>

A FEW THOUGHTS FROM EDUCATIONAL EXPERTS IN THIS AREA:

- ? The idea that English is too mixed up to make sense of is a myth perpetuated by lack of instruction and poor teacher preparation. Spelling is not simple, but when people understand its structure, it is perfectly decodable and not limited to people "born to spell" to understand. (Jones, 2009)
- Q To implement word study effectively, teachers and students alike must become word detectives, engaged in an ongoing attempt to make sense of word patterns and their relationships to one another. (Diane Leipzig)
- 🔗 The correlation between spelling and reading comprehension is high because both depend on a common denominator: proficiency with language. The more deeply and thoroughly a student knows a word, the more likely he or she is to recognize it, spell it, define it, and

A FEW THOUGHTS CONT.

use it appropriately in speech and writing. The major goal of the English writing system is not merely to ensure accurate pronunciation of the written word – it is to convey meaning. If words that sound the same (e.g., rain, rein and reign) were spelled the same way, their meanings would be harder to differentiate. (Joshi, Tremain, Carreker & Moats, 2008)

During Word Work, we focus on spelling and vocabulary work with children, creating a richly literate environment that provides essential and often-skipped practice time. (Boushey and Moser)

CONSULTANT TIPS

Basic implementation would look like this...

Word work occurs daily for 10 - 15 minutes. Alternatives to the Friday Spelling Test are found. Word work is practiced at school; lists of words to study are no longer sent home. Meaningful words are selected for students, e.g. from familiar texts and their notebooks and/or students can self-select words to add their lists. Word walls are continually added to and students are taught to reference it as a key strategy.

A more impactful implementation would look like this...

Word work is differentiated, approximately 2 to 3 different groupings per class. Early grades focus predominantly on high frequency words. Word walls are built with students. Students develop their own personal word wall in a file folder or create a personal dictionary.

Someone who has the basics mastered and could go the extra mile - it might look like this...

Word work is purposeful, intentional, personalized and tied to cross-curricular vocabulary. Teachers guide students to identify patterns, and look for connections to sounds, meanings (etymology), structure (morphology) and related words. The goal is to foster transfer to student writing. Vocabulary strategies are embedded in all content areas.

CHALLENGES/PITFALLS

- ! Students can memorize words but they do not transfer to their writing. Word study is not about memorizing spelling words but about understanding spelling patterns. Provide students with opportunities to compare and contrast words, do structured word inquiries and develop deeper understandings.
- ! Word walls are not being used. They are just another part of the classroom decoration or a static bulletin board display. Words should be added to as the year progresses - approximately 5 words a week. Build in lessons, games and opportunities that require students to refer to the word wall.
- ! A student does not appear to be making gains in spelling. Try implementing alternative strategies such as talking dictionaries, picture dictionaries, focus on "core" vocabulary rather than continually adding more complex words and make use of multi-modal learning methods (hearing, saying it, writing it, using online games to review it - e.g. Spelling City).
- ! Word sorts can become difficult to manage. A teacher blogs about her tips for managing Words Their Way: <http://www.elltoolbox.com/words-their-way.html#.WFAs2uYrK71>
